Missionary Work in Turkey Describe -Social and Personal Chronicle. At the Thursday evening meeting of the First Congregational church the subject was Turkey, Rev. Mr. Ewing led the meeting; there were also remarks by Rev. E. H. Smith.

Turkey is the land of Biblical literature. Yet if has had the worst government on the face of the earth, Our missionaries have been there for ninety years. Many have lost their lives. All this is past history. Now a constitution has been established to stand. For the first time the Moslem has turned his face kindly towards the Christian. A few Turks came into contact with other countries and saw how far behind their own was. They came to have power, until they could dictate to the sultan. He has had complete power over all Mohammedans. Now work can be done among them by our missionaries.

To Avoid Taking Cold. Persons who take cold easily can greatly strengthen the entire respirawater; by "drawing" the salt water into the nostrils and expelling it from the mouth, and by taking deep inhalations of fresh air before an open win-

dow, expanding the chest and holding the air as long as possible, then slowly exhaling it. Do this morning and night for ten minutes, and all tendency to colds will vanish; besides you will notice a tremendous improvement in your health and appearance.

Medical Fees in Old Times. The remuneration of physicians originally consisted in presents, but at the FIRST AID TO INJURED. was already customary. Physicians received also public praise, the "crown of honor," the freedom of the city, the privilege of eating at the king's table. Physicians employed by the state received a yearly salary, as high as \$2,000 in some instances. Rich people would pay enormous sums for a successful treatment, and a case is recorded in which \$200,000 was paid .-

"Have you tried cloves with your tea?" asked the matinee girl. "I went to a studio tea given by Mrs. X., the artist, last week, and on a tray with the sugar and gream sat a cunning little china basket filled with cloves. Some put their cloves in the tea, but I nibbled mine and thought of toothache, men coming back between the acts, and all sorts of memory-conjuring things. Of course, we told more spicy stories after we dipped into the clove basket-why not?"

Protecting New Coment.

The problem of keeping people and animals off a newly laid cement sidewalk, usually a difficult task, is some times solved in the manner here shown. A few hours after this sidewalk was built soft dirt was thrown over it and a little ridge built along each side. The dirt was then well saturated with water. Such treatment was found to be effectual in keeping intruders off, and also furnished moisture for advantageous setting of the coment.

Deafness Cannot be Cured
by local applications, as they cannot
reach the diseased-portion of the ear.
There is only one way to cure deafness, and that is by constitutional
remedies. Deafness is caused by an inflamed condition of the mucous lining
of the Eustachian Tube. When this
tube is inflamed you have a rumbling
sound or imperfect hearing, and when
it is entirely closed. Deafness is the
result, and unless the inflammation
can be taken out and this tube restored to a normal condition, hearing
will be destrayed forever; nine cases
out of ten are caused by Catarrh, which
is nothing but an inflamed condition
of the mucous surfaces.

In America the dandruff germs must go. The war of extermination has been declared. The battle has begun, and already thousands of intelligent Americans have permanently rid themselves of this filthiness.

Today it is no more necessary for a man to have dandruff in his hair than to have tartar on his teeth.

Dandruff can never be cured until the small, aggravating and indomitable dandruff garm is conquered and destroyed.

TIGERS FOND OF HUMAN FLESH. Many Natives of India Yearly Made Prey of Jungle Monarch.

About 4,000 men were eaten by tigers in India between 1900 and 1904. A large proportion of these unfortunates perished during periods of famine, when the beasts are made bold by hunger and are driven to the plains in search of water. The deaths caused by tigers in India constitute 37 per cent, of the whole number due to wild beasts. All tigers are not man eaters, but when a tiger has once tasted man's flesh he will not be content until he has had more of it. Where flocks and herds abound, however, man is rarely a victim of the tiger. An old man-eater is usually very clever and tricky and can avoid the most skillful hunters. It is affirmed that a single tiger in southern India has killed 200 men, and that one in the Himalayas has killed more 300.

Carlyle's Curious Study. Thomas Carlyle, the noted English philosopher and historian, had a ourious study. It comprised the entire third floor of his narrow brick house at Chelsea, a London suburb. The walls of the study were of double thickness, to prevent street noises from annoying the master while at his work, and a skylight afforded the light. Just how fresh air was furnished the room was not apparent to the visitor. There is nothing about the room to suggest comfort, only a close, thick-walled, skylighted long apartment where the great dyspeptic worked and worked ceaselessly, and from where he hurried to the kitchen, in the basement of the house, as soon as his day's labor was done. In the kitchen he received his most intimate Standard friends, and there they smoked their pipes together.
